

# YEARLY REPORT ON THE OPERATION OF THE CZECH GAS SYSTEM FOR 2021

# Contents

|   |           |
|---|-----------|
| <b>1 Abbreviations and definitions</b>  | <b>4</b>  |
| <b>2 Commentary</b>   | <b>6</b>  |
| <b>3 Gas system</b>   | <b>8</b>  |
| 3.1 Yearly balance in the Czech gas system  | 8         |
| 3.2 Yearly balance in the Czech gas system  | 9         |
| 3.3 Balance in the Czech gas system in 2021   | 10        |
| 3.4 Balance in the Czech gas system over the last 10 years  | 11        |
| 3.5 Gas flow into/from the Czech gas system, including DS, by entry/exit country over the last 10 years       | 12        |
| <b>4 Underground gas storage facilities</b>   | <b>13</b> |
| 4.1 Gas flow from/into UGS that form part of the Czech gas system   | 13        |
| 4.2 Gas flow from/into UGS that form part of the Czech gas system over the last 10 years                      | 14        |
| <b>5 Production of all gases</b>  | <b>15</b> |
| 5.1 Production of all gases in the Czech Republic   | 15        |
| 5.2 Natural gas production in the Czech Republic over the last 10 years                                       | 16        |
| <b>6 Natural gas consumption</b>  | <b>17</b> |
| 6.1 Natural gas consumption in the Czech Republic in 2021   | 17        |
| 6.2 Share of natural gas consumption in each period of the year in total annual consumption in the CR         | 18        |
| 6.3 Air temperature in the Czech Republic in 2021   | 19        |
| 6.4 Natural gas consumption in the Czech Republic over the last 10 years                                      | 20        |
| 6.5 Daily maximum and minimum natural gas consumption in the Czech Republic in 2021                           | 21        |
| 6.6 Daily temperature gradient and model natural gas consumption in the Czech Republic                        | 22        |
| 6.7 Daily natural gas consumption in the Czech Republic over the last 10 years                                | 23        |
| <b>7 Reference hourly reading</b>   | <b>24</b> |
| 7.1 Reference hourly reading broken down by distribution system in the CR                                     | 24        |
| 7.2 Balance in the Czech gas system on the KHO day  | 25        |
| 7.3 Balance in the Czech gas system on the KHO day  | 26        |
| 7.4 Reference hourly reading in the Czech Republic over the last 10 years                                     | 27        |
| 7.5 Reference hourly reading in the Czech Republic over the last 10 years                                     | 28        |
| <b>8 Natural gas consumption by customer category and by way of use</b>                                       | <b>29</b> |
| 8.1 Natural gas consumption in the Czech Republic in 2021 and over the last 10 years                          | 29        |
| 8.2 Natural gas consumption in the HD_C category in 2021 and over the last 10 years                           | 30        |
| 8.3 Natural gas consumption in the Czech Republic in the MD_C category in 2021 and over the last 10 year      | 31        |
| 8.4 Natural gas consumption in the LD_C category in 2021 and over the last 10 years                           | 32        |
| 8.5 Natural gas consumption in the DOM category in 2021 and over the last 10 years                            | 33        |
| 8.6 Natural gas supply to CNG stations in the Czech Republic in 2021 and over the last 10 years               | 34        |
| 8.7 Natural gas consumption in the CR for electricity generation in 2021 and over the last 10 years           | 35        |
| 8.8 Natural gas consumption in the Czech Republic by customer category in 2021                                | 36        |
| 8.9 Natural gas consumption broken down by customer category and way of use in the Czech Republic             | 37        |
| <b>9 Natural gas consumption by distribution system</b>   | <b>38</b> |
| 9.1 Natural gas consumption by gas system, customer category and CNG in the Czech Republic                    | 38        |
| 9.2 Natural gas consumption by gas system in the Czech Republic in 2021                                       | 39        |
| 9.3 Gas quantities distributed through local distribution systems in the Czech Republic                       | 40        |
| 9.4 Gas pipeline lengths of gas systems in the Czech Republic by pressure                                     | 41        |
| 9.5 Pipeline lengths of gas systems in the Czech Republic by pressure level over the last 10 years            | 42        |
| <b>10 Tariff statistics by demand category and off-take band in the Czech Republic over the last 10 years</b> | <b>43</b> |
| <b>11 Natural gas consumption by Region</b>   | <b>45</b> |
| 11.1 Natural gas consumption by Region, customer category, and CNG in the Czech Republic                      | 45        |
| 11.2 Natural gas consumption and customer numbers by Region in the Czech Republic                             | 47        |
| 11.3 Numbers of customers by Region (R.), customer category, and CNG in the Czech Republic                    | 48        |
| 11.4 Natural gas consumption by Region (R.) in 2021 and over the last 10 years                                | 49        |
| 11.5 Air temperature by Region (R.) in 2021 and over the last 10 years  | 51        |
| <b>12 Historical data</b>   | <b>52</b> |
| 12.1 Natural gas and town gas consumption in the Czech Republic over the last 70 years                        | 52        |
| 12.2 Natural gas consumption by demand category in the Czech Republic over the last 70 years                  | 54        |
| 12.3 Average air temperature in the Czech Republic over the last 30 years                                     | 57        |
| <b>13 Map of the Czech gas system</b>   | <b>58</b> |

## **Introduction**

Under Section 17 (7) (m) of Act No 458/2000 (the Energy Act) as amended, the Energy Regulatory Office (ERO) publishes the Yearly Report on the Operation of the Czech Gas System for 2020. The statistics contained herein are mainly intended for Czech governmental authorities and institutions and those of the European Union, and the expert circles.

In this report, the ERO discloses all available operating and technical data representing physical gas flows. The ERO obtains data for the yearly report under ERO Public Notice 404/2016 on the particulars and structure of the returns required for preparing reports on the operation of systems in energy industries, including the dates, scope and rules for preparing the returns (the statistics public notice), which came into effect on 1 January 2017. Under its competences set out in Section 20a (4) (e) of Act No 458/2000, the Energy Act, the market operator prepares its monthly and yearly statistics of the electricity and gas markets, which supplement the ERO's statistics with trading data.

All details of the methodology for reporting data for the ERO statistics are specified in the ERO's Explanatory Statement 9/2018 of 14 September 2018 on the method of completing the returns under the statistics public notice for the gas industry. The Explanatory Statement and the current returns are posted on the ERO's website.

All of the data contained herein comes from information received from licensed entities: gas producers and distribution system operators, the gas transmission system operator, and storage system operators.

This Yearly Report on the Operation of the Czech Gas System for 2021 follows up on the ERO's earlier reports released in preceding years and offers information about the gas industry's key statistics for 2021, including their development over the past ten years. Its respective chapters contain statistics on gas balance, production and consumption by category, including gas consumption for electricity generation. The report also contains an evaluation of cross-border gas flows, gas storage, some regional evaluations, and tariff statistics. The Yearly Report for 2021 relies on the data in the report for Q4 2021 and contains some more accurate data.

## 1 Abbreviations and definitions

|                                       |   |
|---------------------------------------|---|
| <b>Balancing difference in the TS</b> | Daily physical gas quantity for fuelling compression stations (fuel gas) plus other gas, which represents unmetered values of the difference-causing quantities in the total balance in the transmission system |
| <b>Actual</b>                         | Actually metered natural gas consumption  |
| <b>Adjusted</b>                       | Natural gas consumption adjusted to the long-term normal temperature determined by the Czech Hydrometeorological Institute  |
| <b>BTS</b>                            | Border transfer station (interconnector)  |
| <b>CNG</b>                            | Compressed Natural Gas  |
| <b>Customers</b>                      | Gas consumption in all customer categories  |
| <b>ČHMÚ</b>                           | The Czech Hydrometeorological Institute   |
| <b>Difference</b>                     | The difference between average temperature and the long-term normal   |
| <b>DOM</b>                            | Households (customer category)  |
| <b>DS</b>                             | Distribution system   |
| <b>DSO</b>                            | Distribution system operators   |
| <b>DTG</b>                            | Daily temperature gradient (change in gas consumption caused by a unit change in temperature)   |
| <b>EG</b>                             | Electricity generation  |
| <b>EG.D</b>                           | EG.D, a.s. – a company operating a regional distribution system   |
| <b>GasNet</b>                         | GasNet, s.r.o. – a company operating a regional distribution system   |
| <b>Green Gas</b>                      | Green Gas DPB, a.s. – a company operating a local distribution system   |
| <b>HD_C</b>                           | High demand customers (customer category)   |
| <b>Heating season</b>                 | The 1st and 4th quarter of the year   |
| <b>KHO</b>                            | Reference hourly reading  |
| <b>KS</b>                             | Compression station   |
| <b>LD_C</b>                           | Low demand customers (customer category)  |
| <b>LDS</b>                            | Local distribution system   |
| <b>LNG</b>                            | Liquefied Natural Gas   |
| <b>MD_C</b>                           | Medium demand customers (customer category)   |
| <b>MND GS</b>                         | MND Gas Storage a.s. – a company operating a UGS facility   |
| <b>Moravia GS</b>                     | Moravia Gas Storage a.s. – a company operating a UGS facility   |
| <b>NET4GAS</b>                        | NET4GAS, s.r.o., the company that operates the gas transmission system, the TSO   |
| <b>NTL</b>                            | Low-pressure gas pipeline (up to 5 kPa)   |
| <b>OP</b>                             | Other gas (includes own use, losses and change in the line pack in distribution systems)  |
| <b>Other companies</b>                | NET4GAS, s.r.o., all LDS, gas producers   |
| <b>PKS</b>                            | Gas for fuelling compression stations in the gas transmission system  |
| <b>PP Distribuce</b>                  | Pražská plynárenská Distribuce, a.s. – a company operating a regional distribution system   |
| <b>PPE</b>                            | Combined cycle power station  |

|                   |  |
|-------------------|--|
| <b>PPL</b>        | Cross-border gas pipeline  |
| <b>PPS</b>        | Transmission system operator   |
| <b>RDS</b>        | Regional distribution system   |
| <b>RWE GS</b>     | RWE Gas Storage CZ, s.r.o. – a company operating UGS facilities  |
| <b>STL</b>        | Intermediate-pressure gas pipeline (from 5 kPa to 0.4 MPa)   |
| <b>The normal</b> | Long-term normal temperature (“the normal”) calculated by the Czech Hydrometeorological Institute for the gas industry |
| <b>TS</b>         | Transmission system  |
| <b>UGS</b>        | Underground gas storage facility   |
| <b>VP</b>         | Gas production   |
| <b>VS</b>         | Gas producers' own use   |
| <b>VTL</b>        | High-pressure pipeline (from 0.4 MPa)  |

## 2 Commentary

In 2021, natural gas was supplied continuously to customers' requirements, specifically at the standard off-take level, which means full off-take in line with the daily gas off-take as agreed in contracts (public notice 344/2012 on states of emergency in the gas system and on methods of ensuring the security standard of gas supply, as amended).

Natural gas inflows from abroad into the Czech gas system (imports into the Czech Republic) totalled 45,652 million m<sup>3</sup> (486,992 GWh) in 2021, up by 5% year-on-year. Almost all natural gas was imported via cross-border delivery stations on the German-Czech border. The flow of natural gas from the Czech gas system to other countries (exports from the Czech Republic) totalled 36,933 million m<sup>3</sup> (394,172 GWh). The balances in the Czech gas system are specified in Chapter 3.

Natural gas flows from the underground gas storage facilities (gas withdrawal) that form part of the Czech gas system amounted to 3,116 million m<sup>3</sup> (33,296 GWh). On the other hand, natural gas flows into the gas storage facilities (gas injection) amounted to 2,516 million m<sup>3</sup> (26,855 GWh). In the storage facilities located in the Czech Republic, operating gas stores amounted to 1,690 million m<sup>3</sup> (18,162 GWh) at the end of the year. Separate gas flows from/into storage facilities in 2021 and for the last ten years are shown in Chapter 4.

Natural gas production in the Czech Republic supplemented the overall gas system balance with 1.4%, i.e. 128 million m<sup>3</sup> (1,384 GWh). Natural gas production rose by 4.2% year-on-year. The report also shows the production of other gases with supply to distribution networks, gas supply to directly connected customers, and gas producers' own use. All these details, including a year-on-year comparison, are set out in Chapter 5.

In 2021, natural gas consumption in the Czech Republic totalled 9.434 bcm, i.e. 100,737 GWh (in the Czech Republic, the average gross calorific value was 10.68 kWh/m<sup>3</sup>, i.e. 38.46 MJ/m<sup>3</sup>). Compared with 2020, actual consumption increased by 8.5%. The average annual temperature was 8.3 °C, and the difference from long-term normal temperature was -0.3 °C and from average temperature in 2020 it differed by -1.1 °C. Gas consumption in the heating season accounted for around 68% of the total annual consumption. The lowest monthly consumption was measured in August (363 million m<sup>3</sup>, i.e. 3,874 GWh) while the peak consumption was registered in January (1,273 million m<sup>3</sup>, i.e. 13,599 GWh). An increase in consumption compared with the same period of 2020 was registered mainly in the first half of 2021. Adjusted to long-term normal temperature using temperature gradients, in 2021 natural gas consumption amounted to 9.320 bcm, i.e. 99,519 GWh, up by 3.5% year-on-year. Chapter 6 offers an overall evaluation of natural gas consumption in the Czech Republic in 2021, including a year-on-year comparison, development of consumption over the past ten years, and ambient temperatures.

Natural gas consumption in the Czech Republic slightly increased over the last ten years and 2021 saw the highest value of this period. The main reasons for the increase in 2021 include a lower average air temperature, the steadily rising gas supply for electricity generation, and gas supply to CNG stations. Over the long term, natural gas consumption exceeded 9 bcm (96 TWh) for the first time since 2007. Natural gas consumption in the Czech Republic is heavily influenced by air temperatures, which have been above the long-term normal temperature for the whole of the ten-year period, except for 2021. The difference between the highest consumption in 2021 and the lowest consumption in 2014 was approximately 2.2 bcm (23.3 TWh). The largest drop in consumption, by 12%, was observed in 2014 when consumption totalled 7.3 bcm (77.4 TWh), the very lowest gas consumption since 1995.

The daily temperature gradient, which indicates the change in gas consumption caused by a unit change in temperature, ranged from 0.969 to 1.512 million m<sup>3</sup>/day/°C (10,345 to 16,148 MWh/day/°C) throughout the 2021 heating season. Summer seasons see the weakest relationship between gas consumption and temperature; in summer, the daily temperature gradient dropped to as low as 0.101 million m<sup>3</sup>/day/°C (1,078 MWh/day/°C). Daily gas consumption in 2021 ranged from 9.188 to 55.065 million m<sup>3</sup> (98,211 to 588,377 MWh) with the ratio between the lowest and highest consumption amounting to 6:1. The maximum daily consumption of natural gas of 55.065 million m<sup>3</sup> (588,377 MWh) was recorded on Thursday 11 February, when the average daily temperature was -8.6 °C. Retroactively for that day, the reference hourly reading (KHO) was declared; it represents hourly gas supply and consumption values from gas businesses, on the basis of which the reference hourly reading in the Czech gas system is determined. These readings suggested that hourly consumption peaked during the morning and afternoon hours, while a more significant decline in consumption occurred during the night. Between 08:00 and 09:00, gas consumption peaked at 2.582 million m<sup>3</sup> (27,597 MWh) while the average temperature was -8.8 °C for that hour. The overall evaluation of the reference hourly reading in the Czech gas system is shown in detail in Chapter 7.

In terms of gas consumption by customer category, in 2021 the high-demand category took the largest share (as usual) of total gas consumption, 48.4%, followed by the household category with 26.7%, the low-demand category with 13.9%, and the medium-demand category with 9.7%. Other gas, which includes own use, losses, changes in the line pack in distribution systems, and gas producers' own use, accounted for 1.3% of the country's total gas consumption. Chapter 8 shows the total share of each of the demand categories in total natural gas consumption in the Czech Republic in 2021 and over the past ten years. There was an increase in gas supply to CNG stations (13%) and in natural gas consumption for electricity generation (9.5%).

As at 31 December 2021, a total of 2,820,013 customers were connected to the gas system in the Czech Republic. Households accounted for more than 92% of them. The largest numbers of household gas customers are in Prague, the Jihomoravský Region, and the Moravskoslezský Region. Over the last ten years, the number of all customers declined by 48,070. The largest number of connected customers over the last ten years, 2,868,083, was seen in 2012. A detailed breakdown of gas consumption and gas pipeline length by distribution system is presented in Chapter 9. Historical data shows the development of natural gas and town gas consumption and customer numbers between 1951 and 2021. In that period, the gas system experienced vigorous development in all segments of gas demand, including the infrastructure. In the 1980s and 1990s, the gradual conversion from town gas to natural gas (with the last town gas supply discontinued in June 1996) contributed to the growth in natural gas consumption. Since 2001, when the highest ever annual natural gas consumption (9.8 bcm, 102.6 TWh) was achieved, consumption was stable and between 2007 and 2015 it even declined quite significantly. The flat and then declining consumption was mainly attributable to changes in energy prices, the end of governmental subsidies for connections to gas supply, the slowdown in the gradual rollout of gas networks in the regions, reductions in the energy intensity of loads (thermal insulation of buildings, modernisation of appliances), companies' pressures for cost cutting, savings in outlays on energy in periods with transitional temperatures, the absence of major projects for connecting new high-demand customers, etc. In 2016, the decline in natural gas consumption ended, and it started to rise slightly again. In 2006, the highest daily consumption of natural gas was measured, 67.6 million m<sup>3</sup> (713.3 GWh), and 2009 saw the largest number of connected customers, 2,871,547 (Chapter 12). The historical data is complete with average air temperatures between 1991 and 2021.

### 3 Gas system

#### 3.1 Yearly balance in the Czech gas system

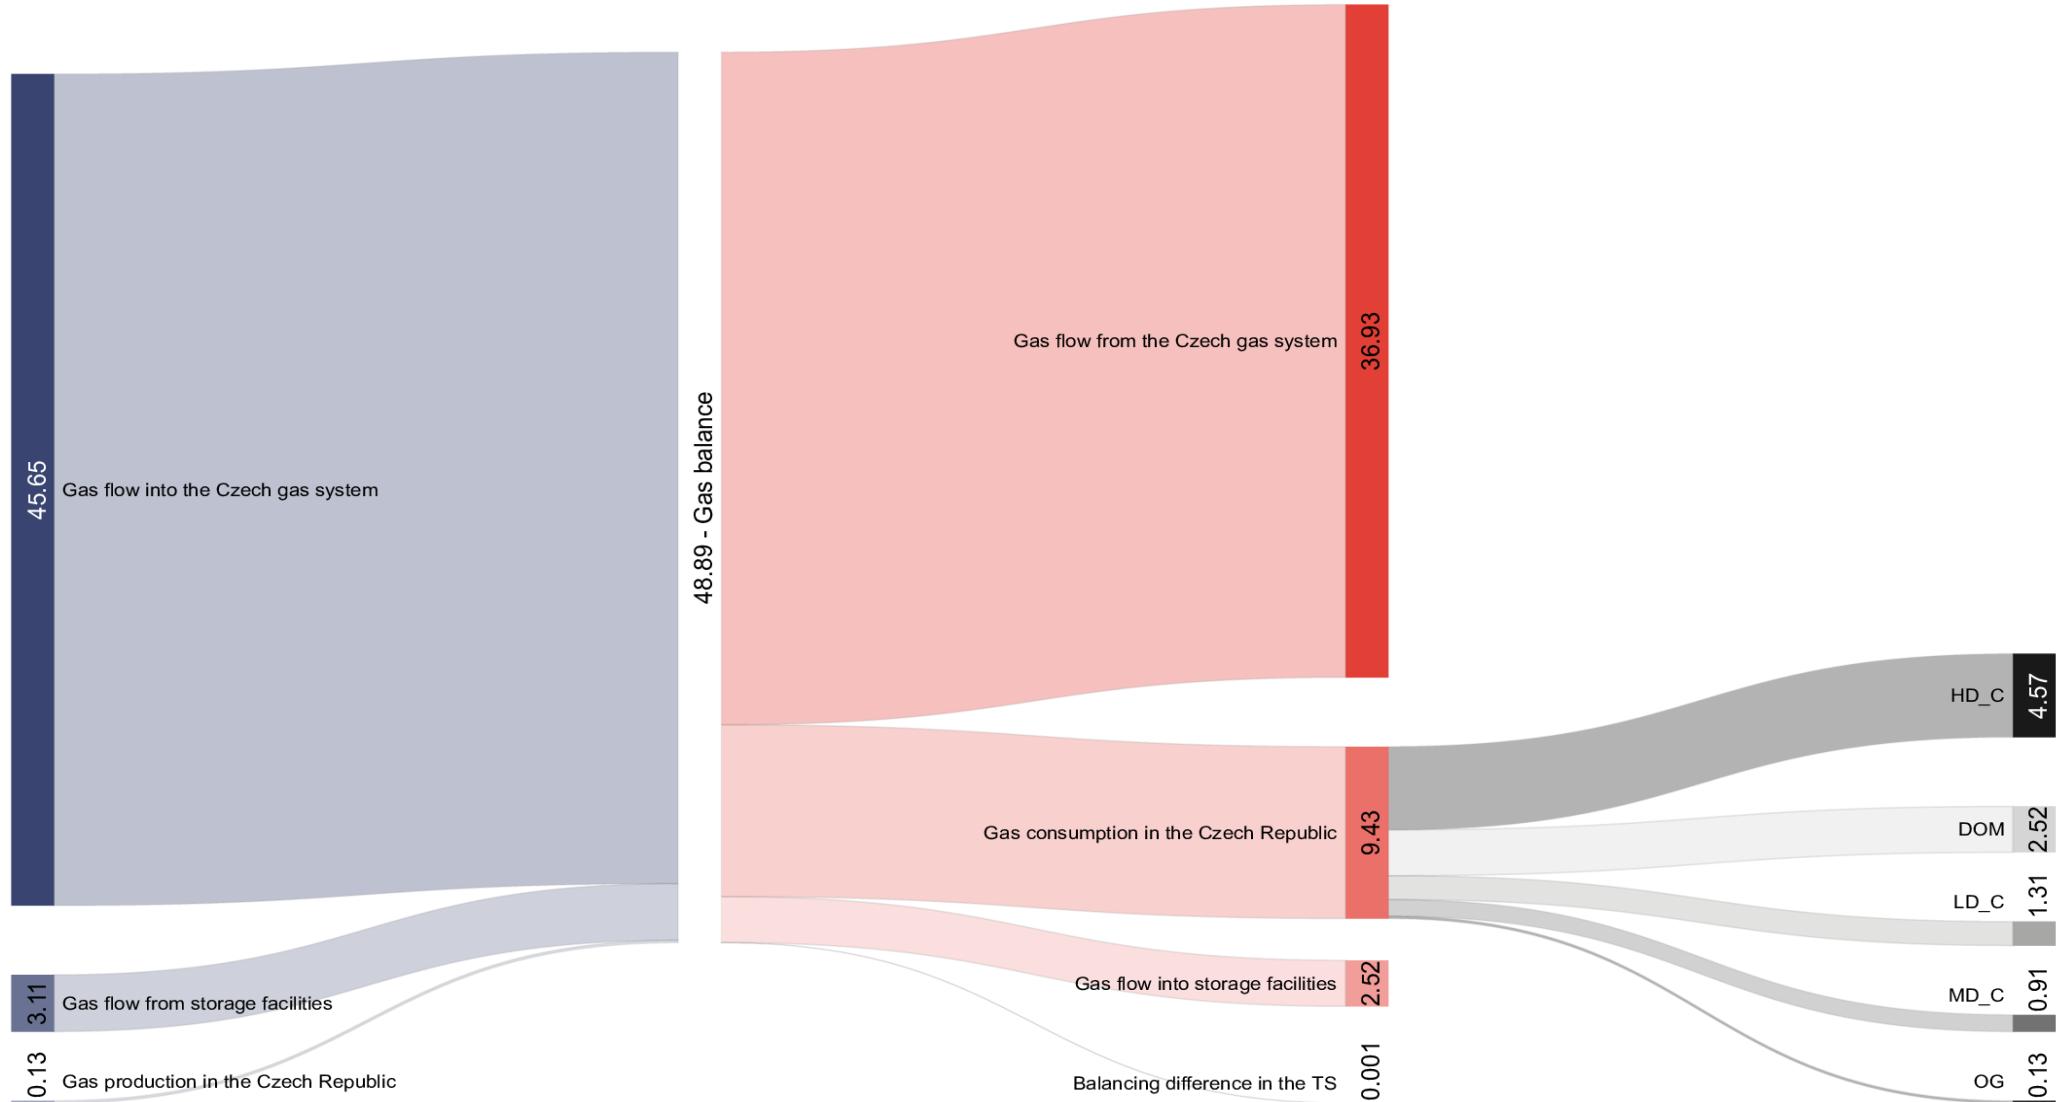

|  |  |                      | th m <sup>3</sup> /yr | MWh/yr             | Aggregate gas quantity in thousands m <sup>3</sup> /day |

Note: The opposite signs of values in volumetric and energy units of the 'Balancing difference in the transmission system' are due to the different gross calorific values at entry into and exit from the gas system. It represents unmetered values of the difference-causing quantities in the total balance in the transmission system.

### 3.2 Yearly balance in the Czech gas system

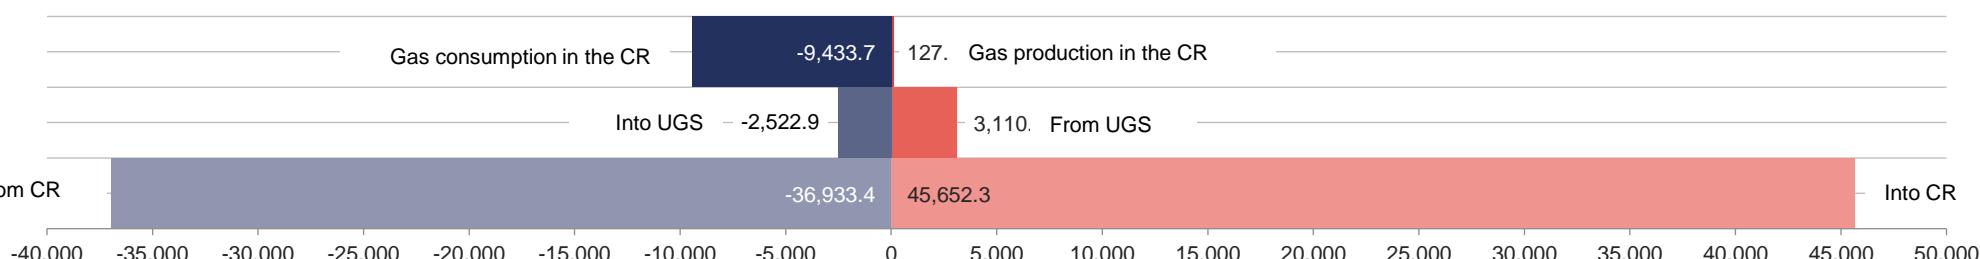

Gas balance for 2021 (bcm)

SSOs' shares of the highest achieved level of operating stores

SSOs' shares of the highest daily gas withdrawal

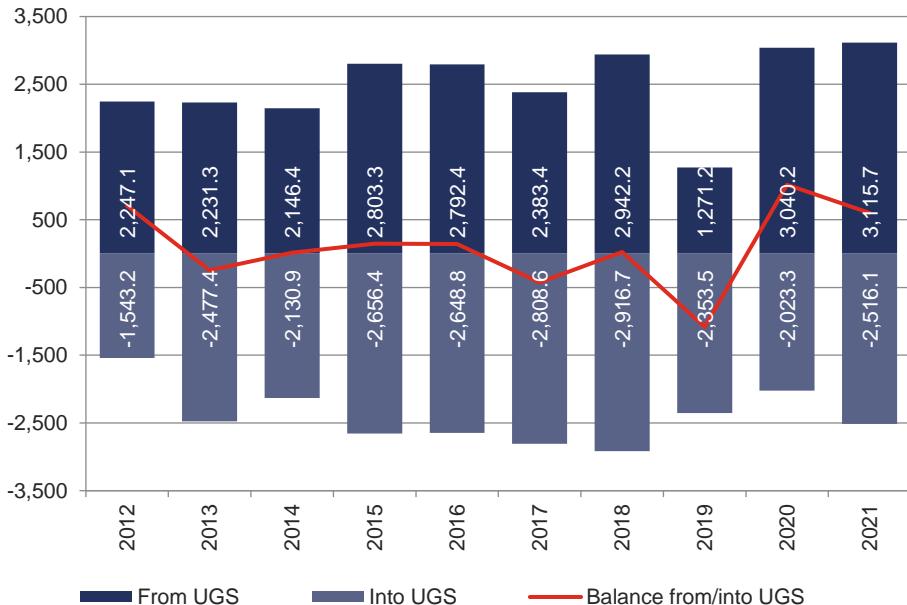

Note: Any differences between stored gas levels and withdrawal from and injection into UGS facilities are due to geological losses, own use, transfer of gas to the cushion, or increase in the stored reserves in the UGS facilities.

## 4.2 Gas flow from/into UGS that form part of the Czech gas system over the last 10 years

### Gas flow from/into UGS that form part of the Czech gas system

(million m<sup>3</sup>)

### Highest level of operating stores

(million m<sup>3</sup>)

Note: Any differences between stored gas levels and withdrawal from and injection into UGS facilities are due to geological losses, own use, transfer of gas to the cushion, or increase in the stored reserves in the UGS facilities. Moravia Gas Storage a.s. commissioned the Dambořice UGS facility on 1 July 2016.

# 5 Production of all gases

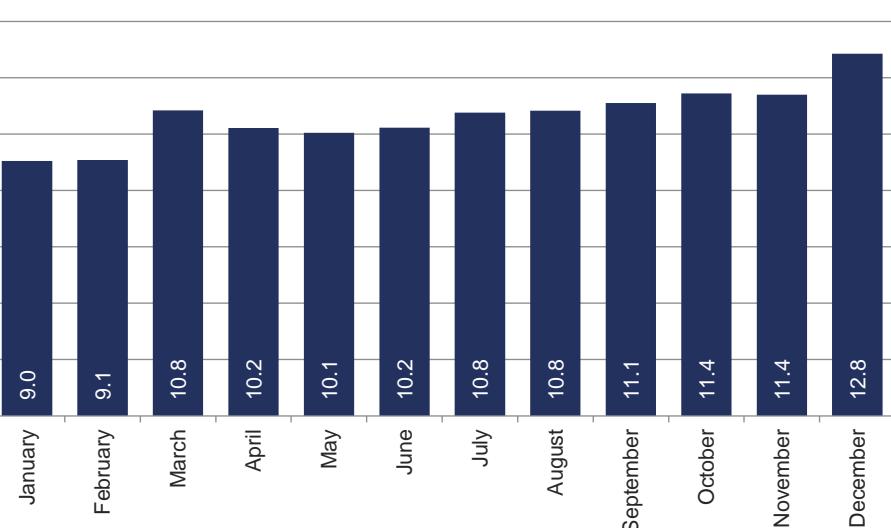

## 5.1 Production of all gases in the Czech Republic

| Gas type  | Type of production                 | thousands m <sup>3</sup> |                  | Y/y change         | MWh           |                    |                    |

## 7.5 Reference hourly reading in the Czech Republic over the last 10 years

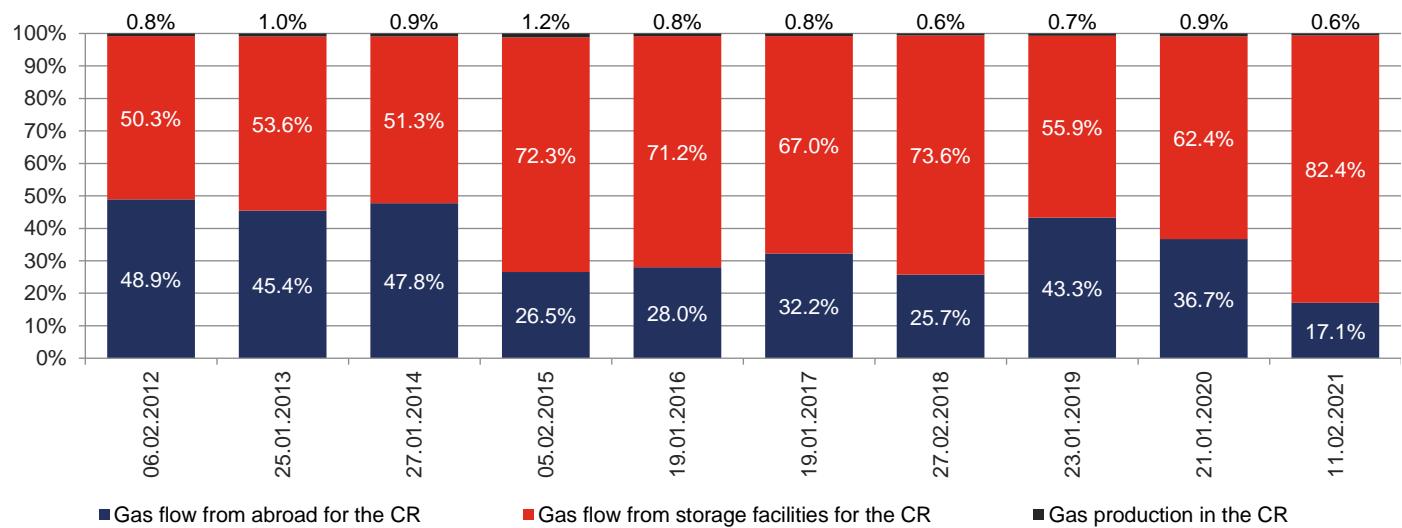

Hourly consumption on the KHO day (thousands m<sup>3</sup>/h)

Maximum hourly consumption on the KHO day (thousands m<sup>3</sup>/h)

Percentage shares of gas sources covering the total KHO day

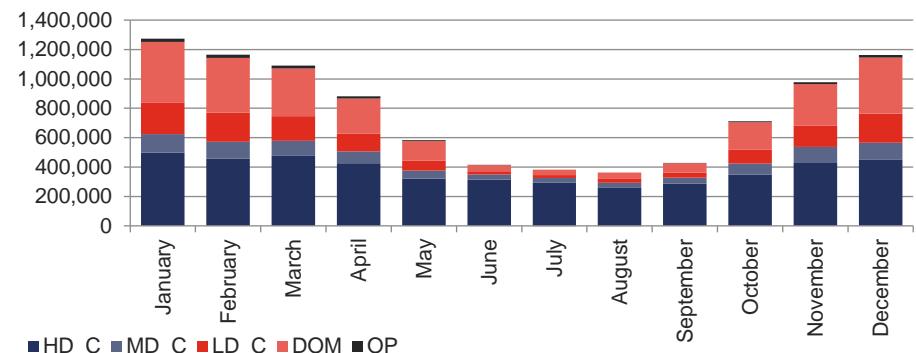

## 8 Natural gas consumption by customer category and by way of use

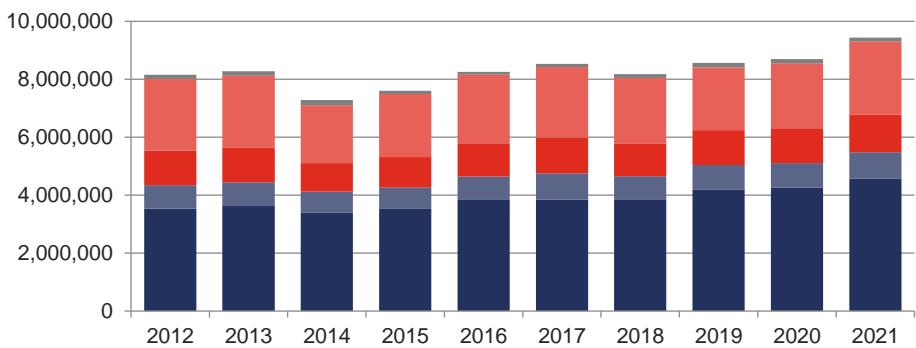

### 8.1 Natural gas consumption in the Czech Republic in 2021 and over the last 10 years

| Period    | Number of Total natural gas consumption customers at the end of the period |           |                                  |       | Average air temperature | Year-on-year change in total consumption |        |  |
|-----------|--|-----------|----------------------------------|-------|-------------------------|--|--------|--|
|           | Total consumption  |           | Average consumption per customer |       |                         |  |        |  |

Natural gas consumption in the year under review (thousands m<sup>3</sup>)

Natural gas consumption over the last 10 years (thousands m<sup>3</sup>)

Number of customers over the last 10 years

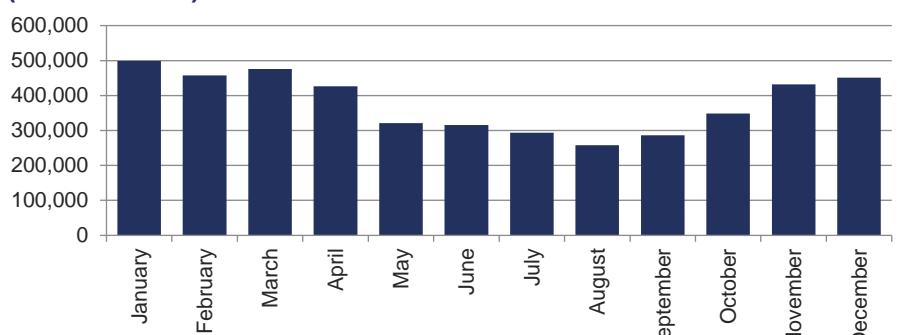

Note: The increase in the number of customers in 2017 was caused by adding customers in LDS, the monitoring of which started on 1 January 2017.

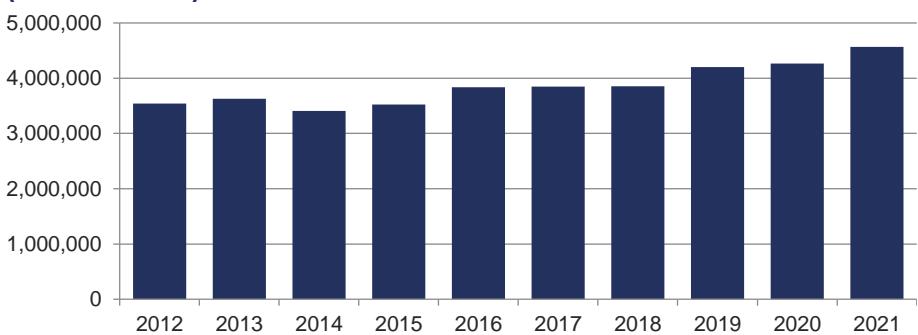

## 8.2 Natural gas consumption in the HD\_C category in 2021 and over the last 10 years

| Period    | Number of Natural gas consumption customers at the end of the period |           |                                  |       | The category's share of total consumption in the CR | Year-on-year change in total consumption |  |  |
|-----------|--|-----------|----------------------------------|-------|---|--|--|--|

Natural gas supply to CNG stations in the year under review (thousands m<sup>3</sup>)

Natural gas supply to CNG stations over the last 10 years (thousands m<sup>3</sup>)

Number of CNG stations over the last 10 years

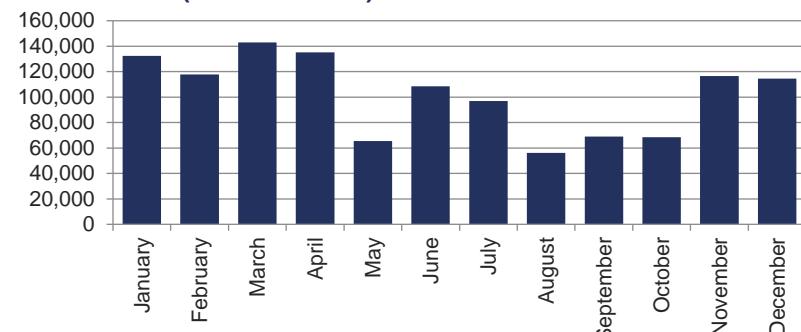

Note: The data for the period from 2010 to 2016 were provided by the Czech Gas Association. In the whole chapter 8, the data on supply to CNG stations are included in each of the demand categories.

## 8.7 Natural gas consumption in the CR for electricity generation in 2021 and over the last 10 years

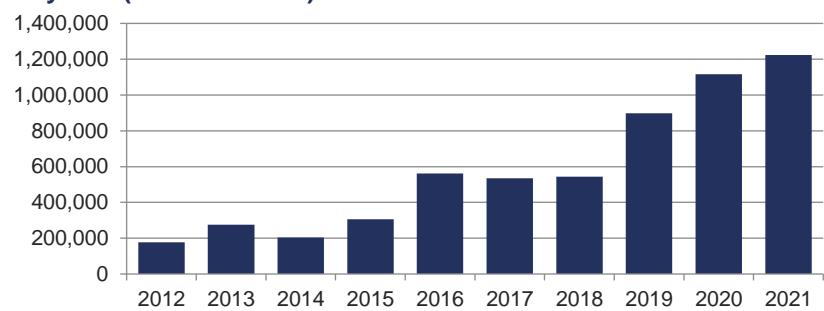

| Period    | Number of Natural gas consumption in the CR for electricity generation |                   |           |                   |            |                   | Electricity generation's share of total consumption in the CR | Y/y change in consumption for electricity generation |  |

Note:

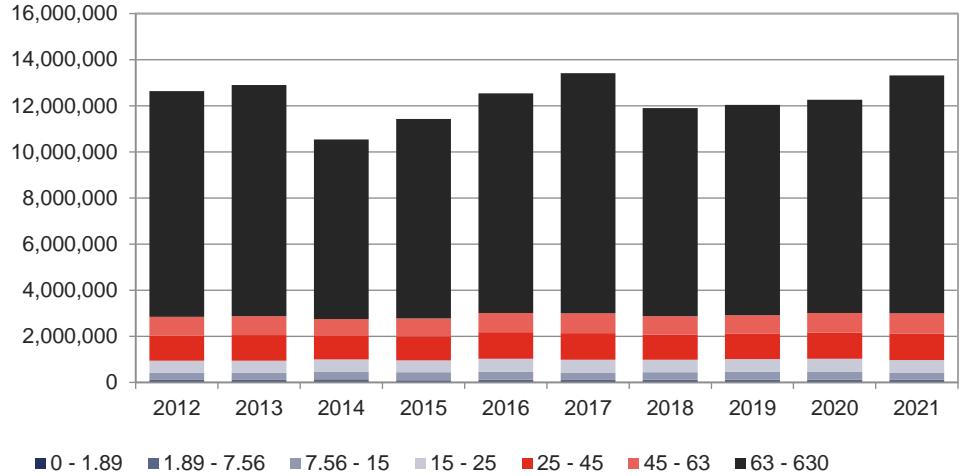

The tariff statistics in Chapter 10 show the sum of data received from RDS operators and the TSO as part of regulatory reporting under Section 20 of the Energy Act. The item 'distributed quantity' does not contain illegal off-take and leakages caused by network disruption billed to third parties. In the gas industry, the tariff bands have been changing over the years.

**HD\_C+MD\_C – distributed quantity (MWh)**

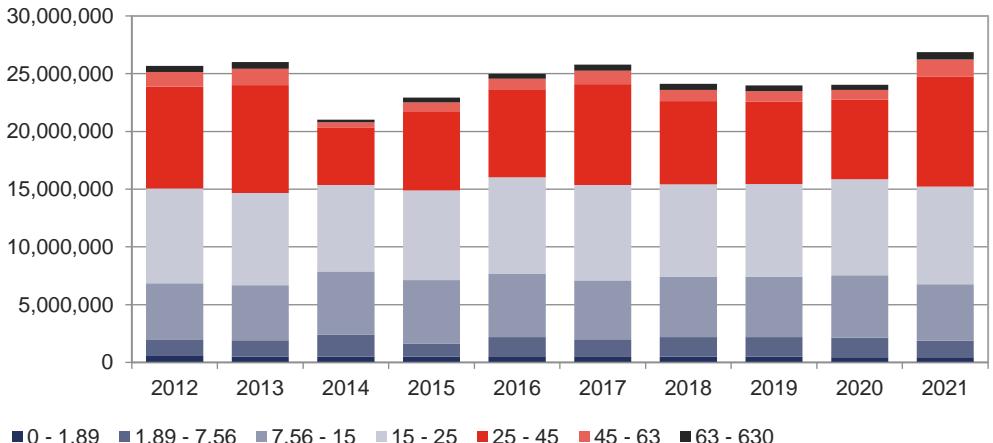

- Customers connected directly to TS
- Off-take from a long-distance pipeline
- Off-take from a local network

**LD\_C – distributed quantity (MWh)**

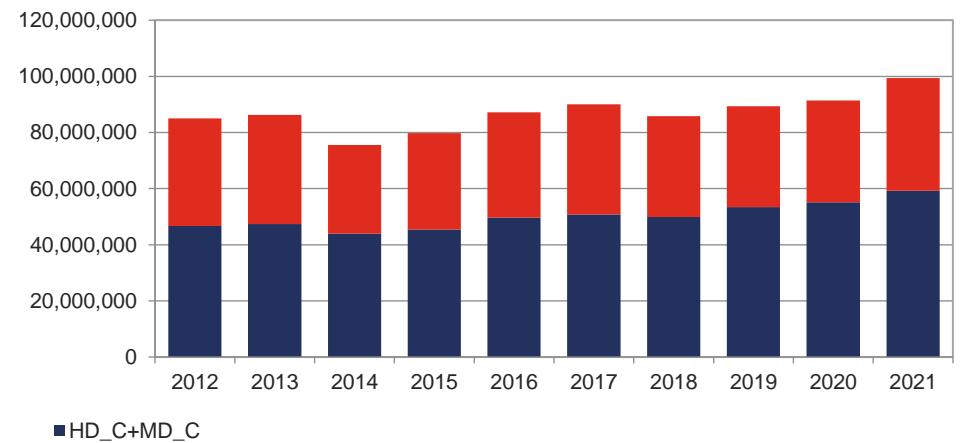

- 0 - 1.89
- 1.89 - 7.56
- 7.56 - 15
- 15 - 25
- 25 - 45

Regions' shares of the total consumption of customers in the CR

Regions' shares of the total number of customers in the CR

Note: The Ústecký and Karlovarský Regions include PPE, which have a major impact on the whole Region's gas consumption.

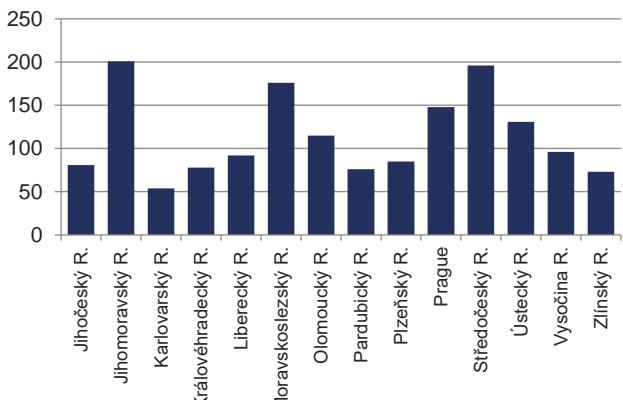

When gas supply to the PPE is deducted, gas consumption is 837,556,000 m<sup>3</sup>, i.e. 8,944,226 MWh in the Ústecký Region.

When gas supply to the PPE is deducted, gas consumption is 223,431,000 m<sup>3</sup>, i.e. 2,388,117 MWh in the Karlovarský Region.

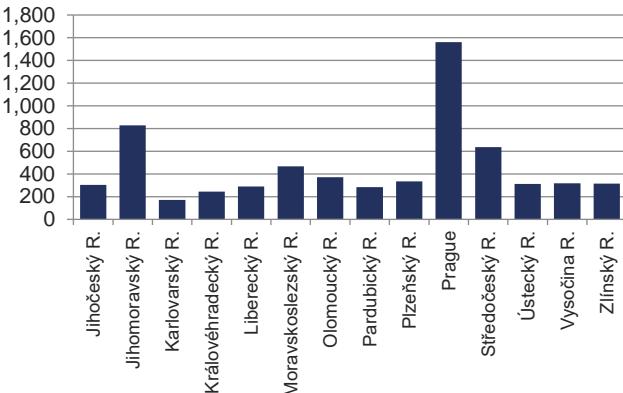

## 11.3 Numbers of customers by Region (R.), customer category, and CNG in the Czech Republic

Note:

Between 1952 and 1980, other gas (OP), which includes own use, losses, and changes in the line pack in distribution systems, was reflected in the high demand category.

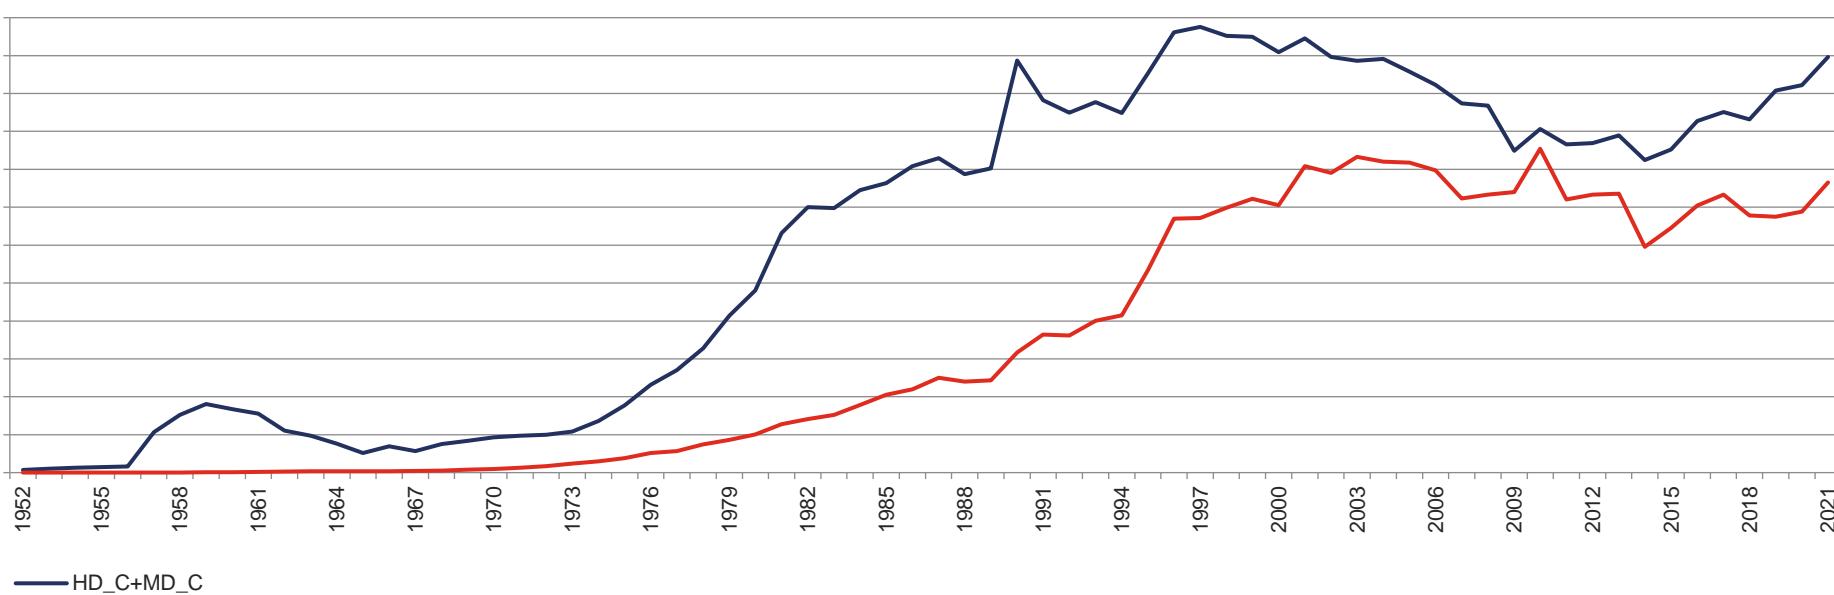

Between 1981 and 2004, a single high demand and medium demand category was monitored; the same applies to the low demand and household category.

Natural gas supply to CNG stations and natural gas consumption for electricity generation are included in the relevant demand category.

**HD\_C+MD\_C / LD\_C+DOM – total distributed quantity (million m<sup>3</sup>)**

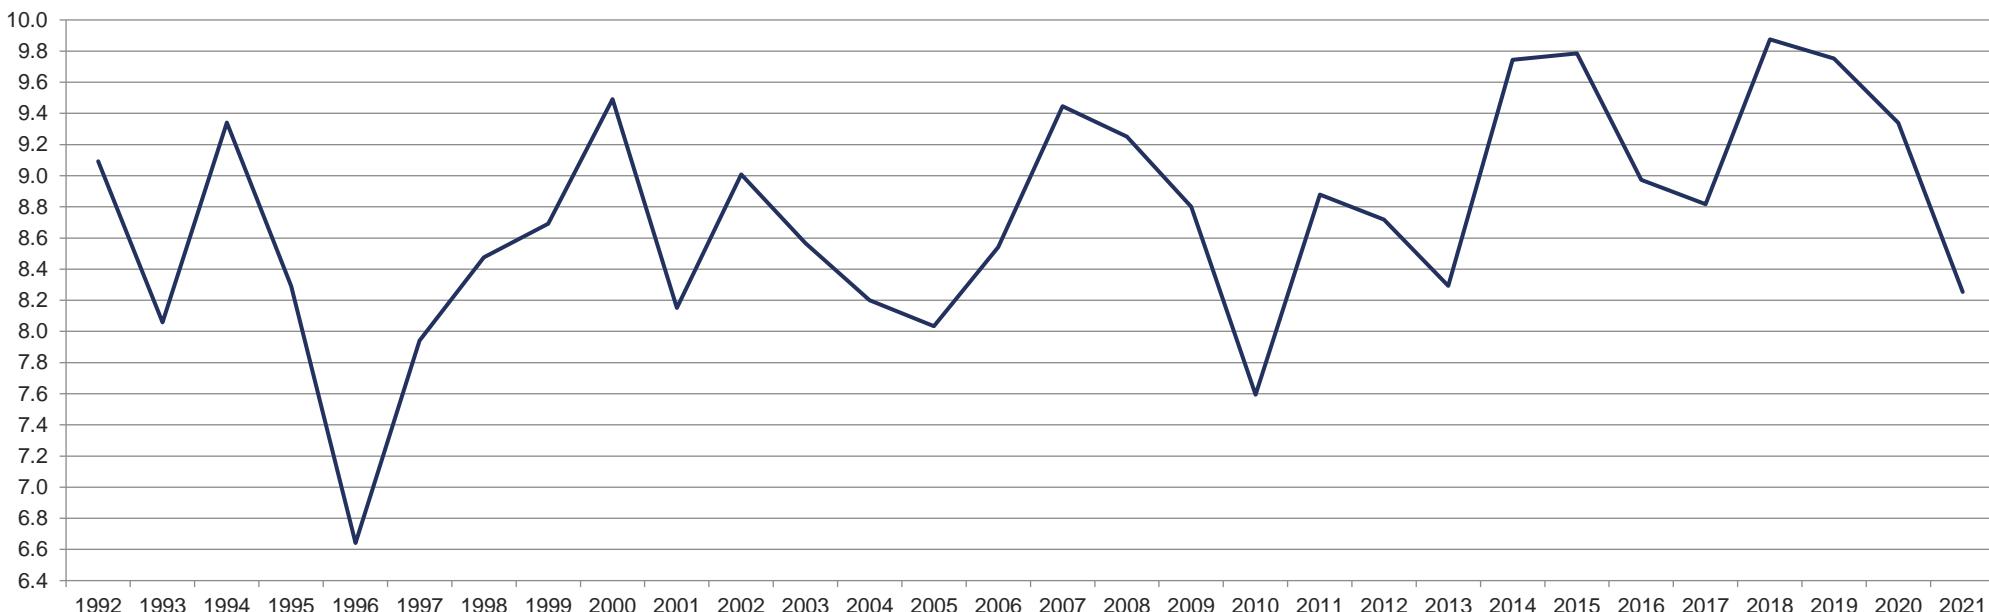

**HD\_C+MD\_C / LD\_C+DOM – distributed quantity (million m<sup>3</sup>)**

## 12.3 Average air temperature in the Czech Republic over the last 30 years

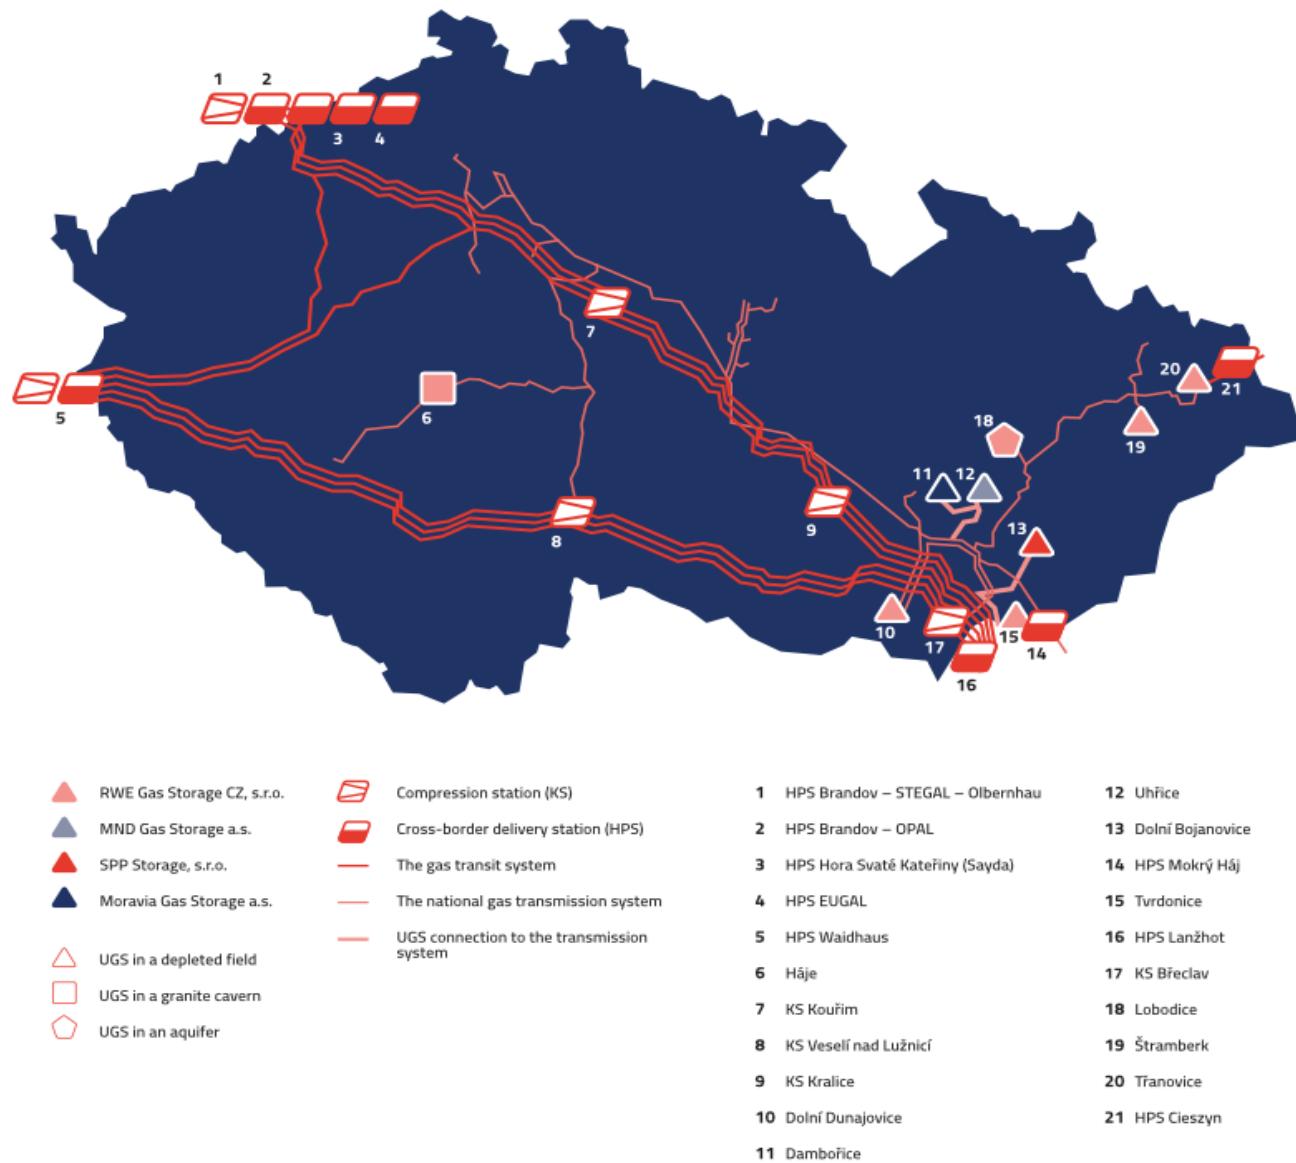

Average air temperature in the CR (°C)
